RULES AND REGULATIONS FOR THE GOVERNMENT OF THE CANTON FIRE DEPARTMENT

PERSONNEL

(1) The Canton Fire Department shall consist of the Board of Fire Engineers, permanent men qualified as drivers and call firemen assigned to companies by the Board of Engineers.

ENGINEERS

(2) The members of the Board of Fire Engineers shall be assigned as follows: one to be elected annually by the Board of Engineers as Chief Engineer, one as Assistant Chief Engineer and one to be clerk of the Board.

The Chief Engineer shall act as chairman of the Board of Fire Engineers and be the executive head of the department. In his absence other members shall assume command in order of their rank.

The Board shall hold meetings on the first Thursday of each month and shall hold such other meetings as may be necessary for the prompt transaction of fire department business.

CHIEF OF DEPARTMENT

(3) The Chief Engineer is charged with the maintenance and upkeep of the apparatus and discipline of the personnel, and may issue such orders as may be necessary from time to time, subject to confirmation by the Board. He shall have supreme command at fires and shall have the power to suspend any member of the department for insubordination, disorderly conduct, intoxication or neglect of duty, said suspension to continue pending action by the Board of Engineers.

APPOINTMENT TO DEPARTMENT

(4) Appointment to the department, with the exception of the Board of Engineers, shall be made under provisions of civil service governing the Fire Department of the Town of Canton.

(5) Every newly appointed member of the permanent or call force shall be on probation for a period of six months from date of such appointment.

(6) Candidates upon appointment to the department shall subscribe to the following oath:

I, ..., having been appointed a member of the Canton Fire Department, hereby agree to abide by ordinances of the Town of Canton, the rules and regulations laid down by the Selectmen or the Board of Fire Engineers and all orders of the Board of Engineers and officers of the department.

Failure or neglect of member to subscribe to this oath within ten days of date of appointment, said member shall be deemed to have declined to take such oath and shall no longer be considered a member of the department.

(7) At the conclusion of such probationary period every member is required to become a member of the Canton Firemen's Mutual Benefit Association.

(8) Any member removed permanently from the Town of Canton shall be deemed to have resigned from the department as of the date of such removal.

DISCIPLINE

(9) Civil Service rules and regulations pertaining to the Town of Canton Fire Department shall govern complaints, charges and the conduct of trial boards and penalties.

Charges in general should be made with no other aim than the good of the service, enforcement of rules and regulations or the adjustment of a wrong, real or fancied, on the part of any member.

BUILDING INSPECTION

(10) A regular system of building inspection for purposes of fire prevention and advanced study of conditions to be dealt

with in case of fire, shall be maintained at the discretion of the Chief and the Board of Engineers. Sufficient authority is found under the law to permit such inspection at any reasonable time.

PERMANENT MEN

(11) Permanent men shall remain in their respective stations while not on active fire duty. They shall care for the stations to which they are attached and the work shall be done under the supervision of the officer or senior man on duty. They must know the location of all boxes and hydrants, streets, ways and lanes in the town and shall make such inspections as shall be required from time to time, familiarizing themselves with the construction, means of entrance and egress of all buildings other than dwellings and must be proficient in the use of the inhalator, gas masks and other protective apparatus as well as the first aid outfit furnished and have a working knowledge of all equipment under their care.

(12) Permanent men shall wear full uniform while on the street but shall not wear uniforms or equipment furnished by the town at any other time except formal occasions such as dances, at home or in some other town, conventions, parades or official gatherings where firemen are identified by their uniform. This paragraph shall be interpreted to prevent the abuse of Town property by men entrusted with its

care. Hat badges and coat badges are the property of the Town and shall be considered as a part of the uniform when the uniform is worn.

DRIVERS

(13) First drivers are charged with maintaining oil and gas in their respective pieces of apparatus, shall make sure that motors are in working order, try lights and other equipment to ensure that all are in working order and shall report immediately any part of equipment or apparatus which is out of order. This duty shall devolve upon substitute drivers in the absence of the first driver. A report shall be made after each run showing the mileage and the amount of gasoline used in refueling.

(14) Drivers shall not operate at an unnecessary or reckless rate of speed.

(15) Drivers shall not operate against a red traffic light except where observation is unobstructed and the way is seen to be clear, unless a member of the department is able to go ahead and succeeds in stopping oncoming traffic.

(16) In cold weather the driver in charge of apparatus is responsible for the condition of the apparatus to prevent freezing. Delegation of this duty to another is not deemed to be sufficient care.

(17) Chains or anti-skid appliances must be affixed at the first moment it is seen that conditions are becoming dangerous.

(18) Drivers are charged with securing additional gasoline and oil if attendance at a fire is prolonged. No one may be sent from the scene of a fire, however, without the consent of the officer in charge of the company or the Chief of Department if more than one company is involved.

(19) Gongs, bells or sirens on all apparatus shall be sounded upon approaching crossings or street intersections when responding to an alarm, except late at night when such action would cause unnecessary disturbance.

(20) The pump operator shall not engage in conversation other than in line of duty while the pump is in operation.

(21) The shortest possible route shall be taken to a fire, except for street conditions or if better time can be made by resorting to other roads because of existing local conditions.

(22) The pump from the central station shall not make any stops to pick up call men unless the apparatus is insufficiently manned upon leaving the station. Call men will be picked up by the ladder truck upon signal from the member who must show himself in the street in full view of the driver.

(23) No piece of apparatus shall be driven over a line of hose unless it is necessary.

FIRE STATIONS

(24) Fire stations shall be kept in an orderly and well regulated condition at all times. A watch shall be maintained each

day from ten A. M. to ten P. M. and it shall be the duty of such man or men to answer all telephone calls, sound alarms, read the tape and announce the location of box, or fire if it is known. Hours for this watch, as well as meal hours, shall be assigned by the officer in charge with the approval of the chief.

(25) Cleaning and routine work should be completed before ten A. M. but may be continued until completed at the discretion of the officer in charge.

(26) The following daily routine work shall be assigned in such a manner as to divide the work evenly among the permanent men present for duty.

(a) Floors shall be swept daily and oftener if necessary.

(b) Furniture, fittings, etc., shall be kept clean and in an orderly condition.

(c) Rubbish and waste material, including ashes, shall be removed to a safe place promptly and never be permitted to accumulate.

(d) Beds must be made up not later than ten A. M. and bedding must at all times be clean and well aired.

(e) Sleeping rooms must be clean and well ventilated.

(f) House heater shall be cared for by assignment and must be given due care and attention. Boiler sections must be cleaned at least twice each month.

(g) Frontage shall be kept clean, grass cut and ice and snow promptly removed in winter.

(h) Hose shall not be left hanging in the tower more than 24 hours. When dry

it shall be taken down, cleaned, rolled and put in racks.

(27) The following are forbidden in quarters or near any of the firehouses.

(a) Gambling.
(b) Card playing or other games after ten P. M. or on Sunday.
(c) Improper, abusive or offensive language.
(d) Disorderly or boisterous conduct, quarreling, fighting or assault.
(e) Provoking or mischievous conduct.
(f) Unclean or objectionable habits.
(g) Unnecessary disturbance of sleeping men.
(h) Meddling with property or belongings of another.
(i) Discussion or controversy on politics or religion.
(j) Loitering upon the apparatus floor.

(28) The following, as being prejudicial to the service, are also forbidden:

(a) Smoking in uniform, on the street or in public.
(b) Intoxication.
(c) Disrespect to a superior.

(29) The man in charge at any fire station shall keep an accurate record, on forms provided, of all responses, telephone calls pertaining to fires or permits, showing the time such call or alarm was received, the number of feet of ladders raised at a fire and the amount of hose, extinguishers or tanks used, length of time consumed, the assessed value of the property involved, the estimated fire loss, the names of members who responded, the names of members who may have been injured at the fire or

while on duty, the names of men left on guard to prevent a rekindle, and any failure of the tappers or other signals or of the recording apparatus. He shall make a reading of air and water pressure, night and morning, and shall make a list of supplies shipped and received with the quantity and description, equipment lost or broken, or any other matters of interest which may transpire in quarters.

(30) The man in charge at any station shall be responsible for good conduct on the part of every person therein whether or not such person is a member of the department.

GENERAL

(31) All members responding to and working at a fire shall return to their respective stations after the extinguishment of the fire for such additional duty as may be required, unless excused by the officer in charge of their company.

(32) Members responding to a call of fire must not leave the scene unless excused by the officer in charge of the company.

(33) A member failing to reach the scene of a fire or his assigned fire station within thirty minutes of the sounding of the alarm shall be deemed absent unless he presents an excuse satisfactory to the officer in charge of the company.

(34) Call members may be fined for each unauthorized absence in proportion to the number of fires but such fines may not ex-

ceed the amount of money due and payable to such member for the usual pay period. Each member will be exempt up to ten percent of the total number of alarms to which his company responds, provided the number of unauthorized absences does not exceed that amount. The term "alarm" shall be interpreted to include company meetings and ordered drills or practice.

(35) Failure to respond to three successive alarms without an accepted excuse shall be deemed sufficient cause for trial.

(36) Early arrivals at a fire, irrespective of their company assignment shall assist in laying first lines and rescue work requiring prompt action. As soon as sufficient men arrive these members shall report to their respective company commanders for such other duty as may be required.

(37) Laddermen are charged with forcing an entrance and with proper ventilation above the fire and with spreading salvage covers. Needless destruction of property in this respect will not be tolerated.

(38) The first duty of every fireman is to prevent the loss of life. To this end a search of every building or dwelling shall be made to determine that no occupants remain within the threatened building.

(39) All officers of the department shall be addressed by their official titles while on duty.

(40) No Fire Department or Town property shall be loaned for any purpose and no apparatus shall be sent or taken out of town without permission of the Chief of Department or member of the Board of En-

gineers in his absence. Driving through another town to reach the scene of a fire in the Town of Canton shall not be considered a breach of this rule.

(41) The captain of each company or someone designated by him shall read the rules and regulations, with such general and special orders as may be issued from time to time, to the members of their respective companies as soon after the first of May each year as is practicable.

(42) In the absence of the Chief or other member of the Board of Fire Engineers the officer or senior man in charge of the first piece of apparatus to arrive, shall be in command at the fire until the arrival of a superior officer.

(43) No member of the department is authorized to make purchases chargeable to the Town except by order of the Chief of Department, or another member of the Board of Engineers in his absence, and this order should be in writing or confirmed by a written order. (Except in case of Forest Warden when such officer is not a member of the Board of Engineers.)

(44) Company meetings and drills shall be held by each company once a month or as ordered by the Board of Engineers.

(45) No member of the department is authorized to permit civilians to drive over a line of hose except in an emergency.

(46) Helmets shall be worn by all members while responding to an alarm, working at or returning from a fire, with the exception of the driver of apparatus.

(47) No pools, benefits or lotteries may be operated by members of the department,

nor shall gratuities be accepted by any member except with the consent of the Board of Engineers.

(48) No person, not a member of the department, shall be permitted to ride on any piece of apparatus without permission of the driver or officer in charge.

(49) All orders of superiors which pertain to the service and which do not conflict with the rules and regulations shall be obeyed promptly and without question. Charges shall be preferred against an offending member for refusal or neglect to obey such lawful order.

(50) No information relative to the business or affairs of the department shall be furnished to persons not connected with the department except as authorized by the Chief or member of the Board of Engineers.

(51) If any member of the department observes any street or highway conditions liable to cause delay or accident to apparatus, or if he knows any condition or occurence which, in the public interest, should be communicated to another public department, he shall promptly inform his immediate superior thereof, and such superior shall promptly notify the head of the respective department involved.

(52) Members of companies not in service or members whose duties do not require their presence within buildings, shall not enter the building unless ordered to do so. Members of companies not in service shall remain with their respective pieces of apparatus equipped and ready for such service as may be required.

(53) Children, unless accompanied by a responsible adult, will not be permitted in fire stations nor upon the premises immediately adjacent thereto. Habitual loafers will not be tolerated.

(54) Smoking on any piece of apparatus is forbidden at any time.

1-2—Three Rounds—No School.

Brush Fire Signal—10 blows followed by 2 Rounds of Box number.

General Instructions

1—Never open a Box or touch the hook except in case of Fire.

2—Never give an alarm for a fire seen at a distance.

3—On discovery of Fire go to the nearest Box, open and pull hook way down once and let go. Keys may be found at houses close to the Box or use the nearest Telephone.

4—In calling Fire Department, when Central answers, say, "Emergency, Fire Department." Give location and be sure and tell if it can be taken care of without sounding an alarm.

5—Do not give Box Alarms for Brush Fires unless property is in immediate danger. Notify the Fire Department by Telephone. These needless alarms make a great expense to the Town and should be avoided.

6—Use Telephone if possible as all Boxes can be rung from Central Fire Station.

First Alarm

Four Rounds of Box number on bells and whistle. Three rounds if pulled from Fire Station.

Second Alarm

Six Strokes—2-2-2.

Third Alarm—General

Nine Strokes—3-3-3.

Second and General Alarms will be given by one of the Engineers.

Dismissal Signal—2 blows slow.

Test blow and Curfew—3 blows given 8:50 p. m.

Call for State Guards—4-4-4.

Call from out of Town for aid—2-3-4. 2 Rounds.

111 Noon Test
222 Second Alarm

FIRE PREVENTION IS YOUR JOB TOO

National Fire Protection Association research shows:

* Each and every day fires in the United States claim an average of 33 lives.

* 1,500 homes, 19 schools, 9 churches, 12 hospitals and nursing homes, 144 stores and 144 industrial plants have fires.

* 12,100 lives are lost annually in fires in the U.S. About 6,500 of these casualties result from dwelling fires.

* 2,100 children are killed in home fires each year. One in every three young victims is alone when fire starts.

* No. 1 cause of building fires: smoking and matches.

YOUR INCINERATOR:

Use it with care. Keep it covered. Burn before 9 a.m. Don't burn on windy days. Don't place your incinerator near grass or leaves. Don't permit large openings through which fire can escape. Your care may help prevent a conflagration.

Thanks for your cooperation....and please, do not call the Fire Department for 'NO SCHOOL' announcements. We need the phone open for a possible emergency call.

John E. Farrington
Chief of Fire Department

NOTE: A permit is required for all open air fires...please get one before you burn!
